17. REPORTING ALLERGIC REACTIONS 12

1. AIMS AND OBJECTIVES

This policy outlines Scarning Primary's approach to allergy management, including how the whole-school community works to reduce the risk of an allergic reaction happening and the procedures in place to respond if ones does. It also sets out how we support our pupils with allergies to ensure their wellbeing and inclusion, as well as demonstrating our commitment to being an allergy aware school.

This policy applies to all staff, pupils, parents and visitors to the school and should be read alongside these other policy:

Supporting Children with Medical Needs Policy.

WHAT IS AN ALLERGY?

Allergy occurs when a person reacts to a substance that is usually considered harmless. It is an immune response and instead of ignoring the substance, the body produces histamine which triggers an allergic reaction.

Whilst most allergic reactions are mild, causing minor symptoms, some can be very serious and cause anaphylaxis, which is a life-threatening medical emergency.

People can be allergic to anything, but serious allergic reactions are most commonly caused by food, insect venom (such as a wasp or bee sting), latex and medication.

2. DEFINITIONS

ANAPHYLAXIS: Anaphylaxis is a severe allergic reaction that can be life-threatening and must be treated as a medical emergency.

ALLERGEN: A normally harmless substance that, for some, triggers an allergic reaction. You can be allergic to anything. The most common allergens are food, medication, animal dander (skin cells shed by animals with fur or feathers) and pollen. Latex and wasp and bee stings are less common allergens.

Most severe allergic reactions to food are caused by just 9 foods. These are eggs, milk, peanuts, tree nuts (which includes nuts such as hazelnut, cashew nut, pistachio, almond, walnut, pecan, Brazil nut, macadamia etc), sesame, fish, shellfish, soya and wheat.

There are 14 allergens required by UK law to be highlighted on pre-packed food. These allergens are celery, cereals containing gluten, crustaceans, egg, fish, lupin, milk, molluscs, mustard, peanuts, tree nuts, soya, sulphites (or sulphur dioxide), and sesame.

ADRENALINE AUTO-INJECTOR: Single-use device which carries a pre-measured dose of adrenaline. Adrenaline auto-injectors are used to treat anaphylaxis by injecting adrenaline directly into the upper, outer thigh muscle. Adrenaline auto-injectors are commonly referred to as AAIs, adrenaline pens or by the brand name EpiPen. There are two brands licensed for use in the UK: EpiPen and Jext Pen. For the purposes of this Policy we will refer to them as EpiPen's.

ALLERGY ACTION PLAN: This is a document filled out by a healthcare professional, detailing a person's allergy and their treatment plan.

DESIGNATED ALLERGY LEAD: The member of staff responsible for overseeing allergy management across the school and acting as the main point of contact for pupils, parents and staff.

NEFFY: Neffy (official name in the UK is EURNeffy) is a nasal spray which delivers adrenaline. It is a needle-free alternative to an adrenaline auto-injector approved. Neffy was approved for use in the UK in 2025 and distribution is expected from late September 2026. There is a factsheet attached to this Policy for reference.

INDIVIDUAL HEALTHCARE PLAN: A detailed document outlining an individual pupil's medical conditions, history, treatment, risks and action plan. This document should be created by schools in collaboration with parents/carers and, where appropriate, pupils. All pupils with an allergy should have an Individual Healthcare Plan and it should be read in conjunction with their Allergy Action Plan.

RISK ASSESSMENT: A detailed document outlining an activity, the risks it poses and any actions taken to mitigate those risks. Allergy should be included on all risk assessments for events on and off the school site.

SPARE ADRENALINE PENS: Schools are able to purchase spare adrenaline pens. These should be held as a back-up, in case pupils' prescribed adrenaline pens are not available. They can also be used to treat a person who experiences anaphylaxis but has not been prescribed their own adrenaline.

3. ROLES AND RESPONSIBILITIES

Scarning VC Primary takes a whole-school approach to allergy management.

3.1 Designated Allergy Lead

The Designated Allergy Lead is Erika Simpson. They report into Margaret Hollingworth Governor. They are responsible for:

- Ensuring the safety, inclusion and wellbeing of pupils and staff with an allergy;
- Taking decisions on allergy management across the school;
- Championing and practising allergy awareness across the school;
- Being the overarching point of contact for staff, pupils and parents with concerns or questions about allergy management;
- Ensuring allergy information is recorded, up-to-date and communicated to all staff.
- Making sure all staff are appropriately trained, have good allergy awareness and realise their role in allergy management (including what activities need an allergy risk assessment);
- Ensuring staff, pupils and parents have a good awareness of the school's Allergy and Anaphylaxis Policy, and other related procedures. [Consider obtaining and recording confirmation from staff that they have read and understood the policy];
- Reviewing the school's stock of spare adrenaline pens (check the school has an appropriate number for the setting, that they hold the correct dose, that spare adrenaline pens are stored appropriately) and ensuring staff know where they are;
- Keeping a record of any allergic reactions or near-misses, reporting these to the appropriate authority (e.g. Under RIDDOR) where necessary and ensuring the circumstances are investigated and learnings shared;
- Regularly reviewing and updating the Allergy and Anaphylaxis Policy; and
- Ensuring there is an anaphylaxis drill once a year.

At regular intervals the Designated Allergy Lead will check procedures and report to the SMT.

3.2 School Office

The school office is responsible for:

- Collecting and coordinating the paperwork (including Allergy Action Plans and Individual Healthcare Plans) and information from families (this is likely to involve liaising with the admissions team for new joiners);
- Supporting the Designated Allergy Lead with disseminating this information to all school staff, including the catering team, occasional staff and those running clubs
- Ensuring the information from families is up-to-date, and reviewed annually (at a minimum) Coordinating medication with families and ensuring medication is in date.
- Keeping an adrenaline pen register to include adrenaline pens prescribed to pupils and the school's stock of spare adrenaline pens, including brand, dose and expiry date. The location of spare adrenaline pens should also be documented;
- Regularly checking spare adrenaline pens are where they should be, and that they are in date;
- Replacing the spare adrenaline pens when necessary;

3.3 School Office/Admissions

The school office team are likely to be the first to learn of a pupil or visitor's allergy. They should work with the Designated Allergy Lead to ensure that:

- There is a clear method to capture allergy information or special dietary information at the earliest opportunity;
- There is a clear structure in place to communicate this information to the relevant parties (i.e. school nursing team, catering team);
- Parents and applicants are informed of catering arrangements during admission events; and
- Plans are made for emergency medication if the child is to be left without parental supervision.

3.4 All staff

All school staff, including teaching staff, support staff, occasional staff (for example sports coaches, music teachers and those running breakfast and afterschool clubs are responsible for:

- Championing and practising allergy awareness across the school;
- Reading, understanding and putting into practice the Allergy and Anaphylaxis Policy and related procedures, and asking for support if needed;
- Being aware of pupils (and staff, when necessary) with allergies and what they are allergic to;
- Considering the risk to pupils with allergies posed by any activities and assessing whether the use of any allergen in activity is necessary and/or appropriate;
- Ensuring pupils always have access to their medication or carrying it on their behalf
- Being able to recognise and respond to an allergic reaction, including anaphylaxis, after appropriate training;

- Taking part in training and anaphylaxis drills as required (at least once a year). Whilst it is the school's responsibility to ensure staff have received annual training, if the member of staff is aware they have not received any allergy training in the last 12 months they should alert a manager;
- Considering the safety, inclusion and wellbeing of pupils with allergies at all times. Preventing and responding to allergy-related bullying, in line with the school's anti-bullying policy;
- Forwarding any communication or information that comes directly to them from parents regarding allergens to the School office;
- Ensuring that pupils have their medication and their Allergy Action Plan or Individual Health Care Plan with them when leaving school site, for a match or trip.

3.5 All parents

All parents and carers (whether their child have an allergy or not) are responsible for:

- Being aware of and understanding the school's Allergy and Anaphylaxis Policy and considering the safety and wellbeing of pupils with allergies;
- Providing the school with information about their child's medical needs, including dietary requirements and allergies, history of their allergy, any previous allergic reactions or anaphylaxis. They should also inform the school of any related conditions, for example asthma, hay fever, rhinitis or eczema;
- Considering and adhering to any food restrictions or guidance the school has in place when providing food, for example in packed lunches, as snacks or for fundraising events;
- Refraining from telling the school their child has an allergy or intolerance if this is a preference or dietary choice;
- Encouraging their child to be allergy aware.

3.6 Parents of children with allergies

In addition to point 4.5, the parents and carers of children with allergies should:

- Work with the school to fill out an Individual Healthcare Plan and provide an accompanying Allergy Action Plan;
- If applicable, provide the school or their child with two labelled EpiPen's and any other medication, for example antihistamine (with a dispenser, i.e. spoon or syringe), inhalers or creams;
- Ensure medication is in-date and replaced at the appropriate time;
- Ensure their child has access to their allergy medication, including two EpiPen's if prescribed, on the journey to and from school;
- Update school with any changes to their child's condition and ensure the relevant paperwork is updated too;
- Provide the school with an up-to-date photograph of their child and sign the associated permission for it to be shared appropriately as part of their allergy management;

- Support their child to understand their allergy diagnosis and to advocate for themselves and to take reasonable steps to reduce the risk of an allergic reaction occurring e.g. not eating the food to which they are allergic.

3.7 All pupils

All pupils at the school should:

- Be allergy aware;
- Understand the risks allergens might pose to their peers and respect measures to support them;
- Learn how they can support their peers and be alert to allergy-related bullying;
- Older pupils will learn how to recognise an allergic reaction and support their peers and staff in case of an emergency; and

[All of the above should be done in an age and capability appropriate way.]

3.8 Pupils with allergies

In addition to point 4.7, pupils with allergies are responsible for:

- Knowing what their allergies are and how to mitigate personal risk [this will depend on age and capability];
- Avoiding their allergen as best as they can;
- Understanding the importance of following the school specific processes of lunch and snack services and how that mitigates risk;
- Understanding that they should notify a member of staff if they are not feeling well, or suspect they might be having an allergic reaction;
- Carrying y two adrenaline auto-injectors with them at all times, if age and capability appropriate. They must only use them for their intended purpose;
- Understanding how and when to use their adrenaline auto-injector;
- Talking to the Designated Allergy Lead or a member of staff if they are concerned by any school processes or systems related to their allergy;
- Raising concerns with a member of staff if they experience any inappropriate behaviour in relation to their allergies;
- Pupils permitted to leave the school site [during the school day or at a Boarding School] should know what to do if they have an allergic reaction off school premises. This should include how to treat themselves and raise the alarm to get help; and
- If age and capability appropriate, ensuring they have their medication with them on the journey to and from school.

4. INFORMATION AND DOCUMENTATION

4.1 Register of pupils with an allergy

The school has a register of pupils who have a diagnosed allergy. This includes children who have a history of anaphylaxis or have been prescribed adrenaline pens, as well as pupils with an allergy where no adrenaline pens have been prescribed.

4.2 Individual Healthcare Plans

Each pupil with an allergy has an Individual Healthcare Plan. The information on this plan includes:

- Known allergens and risk factors for allergic reactions;
- A history of their allergic reactions;
- Detail of the medication the pupil has been prescribed including dose, this should include EpiPen's pens, antihistamine etc;
- A copy of parental consent to administer medication, including the use of spare EpiPen's pens in case of suspected anaphylaxis;
- A photograph of each pupil; and
- A copy of their Allergy Action Plan. See definitions for the BSACI templates.

5. ASSESSING RISK

Allergens can crop up in unexpected places. Staff (including visiting staff) will consider allergies in all activity planning and include it in risk assessments. Some examples include:

- Classroom activities, for example craft using food packaging, science experiments where allergens are present, food lessons or cooking;
- Bringing animals into the school, for example a dog or hatching chick eggs can pose a risk;
- Running activities or clubs where they might hand out snacks or food "treats". Ensure safe food is provided or consider an alternative non-food treat for all pupils; and
- Planning special events, such as cultural days and celebrations.

Inclusion of pupils with allergies must be considered alongside safety and they should not be excluded. If necessary, adapt the activity. The School will ensure compliance with the Equality Act 2010.

6. FOOD, INCLUDING MEALTIMES & SNACKS

6.1 Catering in school

The school is committed to providing a safe meal for all students, staff and visitors, including those with food allergies.

- Due diligence is carried out with regard to allergen management when appointing catering staff;
- All catering staff and other staff preparing food will receive relevant and appropriate allergen awareness training;
- [Schools with Early Years settings should adhere to new Early Years Foundation Stage statutory guidance. The "Safer Eating" section has the relevant information for allergies.;

- Anyone preparing food for those with allergies will follow good hygiene practices, food safety and allergen management procedures;
- The catering team will endeavour to get to know the pupils with allergies and what their allergies are, supported by school staff;
- The catering team will endeavour to provide varied meal options to students and staff with allergies;
- The school has robust procedures in place to identify pupils with food allergies, our catering provider Aspens have photo cards of children who have food allergies and separate order forms are completed for children ordering hot dinners, medical mini care plans are available on the Google drive for all staff to see. Paper copies of care plans are available in the medical room and back office.
- If food is not being served directly by Aspens staff this will be clearly labelled with the child's full name.
- Pre-packaged food will comply with PPDS legislation (Natasha's Law) requiring the allergen information to be displayed on the packaging;
- Where changes are made to the ingredients this will be communicated to pupils with dietary needs by the school office;
- We are a nut free school.

6.2 Food brought into school

We do not allow birthday cakes or sweets to be distributed/eaten in class.

Any cake sales that take place on school grounds will only sell shop bought cakes where the ingredients are clearly displayed.

Food eaten in the staff room/classrooms by staff must not contain nuts.

School packed lunches should not contain anything with nuts in this includes Nutella or similar spread.

6.3 Food hygiene for pupils

- Pupils will wash their hands before and after eating;
- Sharing, swapping or throwing food is not allowed;
- Water bottles and packed lunches should be clearly labelled.

7. EDUCATIONAL VISITS AND SPORTS FIXTURES

- Staff leading the trip will have a register of pupils with allergies and details of their medication. Staff should notify the trip leader of any allergies;
- Allergies will be considered on the risk assessment and catering provision put in place;
- Parents, and pupils where appropriate, may be consulted if considered necessary, or if the trip requires an overnight stay;
- Staff accompanying the trip will be trained to recognise and respond to an allergic reaction;
- See EpiPen's section for School Trips and Sports Fixtures.

8. INSECT STINGS

Insert your measures for preventing and dealing with insect stings. For example, those with a known insect venom allergy should:

- Avoid walking around in bare feet or sandals when outside and when possible keep arms and legs covered;
- Avoid wearing strong perfumes or cosmetics; and
- Keep food and drink covered.

The school staff will monitor the grounds for wasp or bee nests. Pupils (with or without allergies) should notify a member of staff if they find a wasp or bee nest in the school grounds and avoid them.

9. ANIMALS

It's normally the dander (flakes of skin) saliva or urine that causes a person with an animal allergy to react.

Precautions to limit the risk of an allergic reaction include:

- A pupil with a known animal allergy should avoid the animal to which they are allergic;
- If an animal comes on site a risk assessment will be done prior to the visit;
- Areas visited by animals will be cleaned thoroughly;
- Anyone in contact with an animal will wash their hands after contact;
- School trips that include visits to animals will be carefully risk assessed.

10. ALLERGIC RHINITIS/ HAY FEVER

Pupils with a seasonal pollen allergy and hay fever and persistent nasal allergy due to house dust mites or other allergens may require the use of inhalers/antihistamine throughout the day. In line with our medicine in school policy this will be kept at a central point in the school office and administered when required after speaking to a parent/guardian. They may also require limited time outside during high pollen count days.

11. INCLUSION AND MENTAL HEALTH

Allergies can have a significant impact on mental health and wellbeing. Pupils may experience anxiety and depression and are more susceptible to bullying.

- No child with allergies should be excluded from taking part in a school activity, whether on the school premises or a school trip;
- Pupils with allergies may require additional pastoral support including regular check-ins from their teacher etc;
- Affected pupils will be given consideration in advance of wider school discussions about allergy and school Allergy Awareness initiatives; and

- Bullying related to allergy will be treated in line with the school's anti-bullying policy.

12. EpiPen's

See the government guidance on EpiPen's in Schools.

12.1 Storage of EpiPen's

- Pupils prescribed with EpiPen's will have easy access to two, in-date pens at all times;
- EpiPen's are to be stored centrally - these can be located in the bottom draw by the front office (spare pens are here as well). If a child is in EYFS these will be stored on the top shelf in the EYFS group room (spare pens are also located here).
- Spot checks will be made to ensure EpiPen's pens are where they should be and in date;
- EpiPen's pens must not be kept locked away;
- EpiPen's should be stored at moderate temperatures (see manufacturer's guidelines), not in direct sunlight or above a heat source (for example a radiator); and
- Used or out of date pens will be disposed of as sharps.

12.2 Spare EpiPen's pens

This school has 4 spare EpiPens to be used in accordance with government guidance.

The locations of spare EpiPen's are clearly signposted. These are: The bottom draw behind the front office desk, where children's EpiPen's are kept in the main school and on the top shelf in the EYFS group room, again where children's EpiPen's are kept.

The Allergy Lead is responsible for:

- Deciding how many spare pens are required;
- What dosage is required, based on the Resuscitation Council UK's age-based guidance (see page 11);
- Which brand(s) to buy. Schools are recommended to buy a single brand if possible to avoid confusion;
- The purchasing of spare EpiPen's which can be obtained at low cost from a local pharmacy. See government guidance above; and
- Distribution around the site and clear signage.

12.3 EpiPen's on off-site activities

- No child with a prescribed EpiPen's will be able to go on a school trip without two of their own devices. It is the trip leader's responsibility to check they have them;
- EpiPen's will be kept close to the pupils at all times e.g. not stored in the hold of the coach when travelling or left in changing rooms;
- EpiPen's will be protected from extreme temperatures;
- Staff accompanying the pupils will be aware of pupils with allergies and be trained to recognise and respond to an allergic reaction; and
- Consider whether to take spare EpiPen's to off-site activities. This should be recorded as part of the risk assessment process.

13. RESPONDING TO AN ALLERGIC REACTION /ANAPHYLAXIS

See appendix on recognising and responding to an allergic reaction

If a pupil has an allergic reaction:

- Treat the pupil in accordance with their Allergy Action Plan;
- If anaphylaxis is suspected administer adrenaline without delay;
- Treat the pupil where they are. Lie them down with their legs raised and bring medication to them;
- Use pupil's own prescribed medication if immediately available;
- Pupil can administer the EpiPen themselves [if able to] or a member of staff can administer pen. Ideally the member of staff will be trained, but in an emergency, anyone can administer adrenaline;
- If the pupil's own EpiPen is not available or misfires, then use a spare one;
- If anaphylaxis is suspected but the pupil does not have a prescribed EpiPen or Allergy Action Plan, lie the pupil down with their legs raised, call 999 and explain anaphylaxis is suspected. Inform the operator that spare EpiPen's are available and follow instructions from the operator. The MHRA says that in exceptional circumstances, a spare EpiPen can be administered to anyone for the purposes of saving their life;
- If, after 5 minutes, there is no improvement, use a second EpiPen and call the emergency services again and inform them that a second dose of adrenaline has been given;
- Do not move the pupil until a medical professional/ paramedic has arrived, even if they are feeling better; and
- Anyone who has had suspected anaphylaxis and received adrenaline must go to hospital, even if they appear to have recovered. A member of staff should accompany them in an ambulance until a parent or guardian arrives.

14. TRAINING

14.1 The school is committed to training all staff annually to give them a good understanding of allergy.

This includes:

- Understanding what an allergy is;
- How to reduce the risk of an allergic reaction occurring;
- How to recognise and treat an allergic reaction, including anaphylaxis;
- How the school manages allergy, for example Emergency Response Plan, documentation, communication etc;
- Where adrenaline pens are kept (both prescribed pens and spare pens) and how to access them;
- The importance of inclusion of pupils with food allergies, the impact of allergy on mental health and wellbeing and the risk of allergy related bullying;

- Understanding food labelling; and
- Taking part in an anaphylaxis drill.

14.2 The school will carry out an anaphylaxis drill once a year.

This includes:

- An exercise simulating an event where a pupil or member of staff has an allergic reaction and testing the whole school response.

15. ASTHMA

It is vital that pupils with allergies keep their asthma well controlled, because asthma can exacerbate allergic reactions. Please see policy Supporting Children with Medical Needs Policy for how Asthma is managed within the school.

16. REPORTING ALLERGIC REACTIONS

The school will log allergic reaction incidents and near-misses on the BehaviourWatch system.
